WebEx Technologies

Web developer

September 2007 — January 2009, January 2010 — May 2011 | Yerevan, Armenia

— Developed a bunch of websites based on self-written CMS (Symbiosis).

Skills

I'm focused on the result and use to work in a team. Love the cases when the team has full-stack control of the project. On the front-end side, I prefer to use **TypeScript**, **React**, **Reflux** or **Redux**, **SASS** and sure **Webpack**. On the back-end side, I prefer to use **Node.js** and **Go**. I have experience with following databases and engines: **MongoDB**, **MySQL**, **Redis**, **RabbitMQ**, **Manticore Search** (a fork of **Sphinx**). Familiar with mobile development **React Native**, **Cordova**, and **Java** (**Android**). I use TDD on the projects when possible. I'm familiar with UI tests. I'm also familiar with basic DevOps stuff (**Docker** and **Docker Swarm**). Things I have mentioned are just my preferences, in the reality, I'm making decisions based on the situation.

Side Projects

CodeTrace.com
Shows developers skills based on the source code.
Stack: Go, JavaScript, Node.js, Express, Docker, MongoDB, Redis, RabbitMQ, React, Reflux.

SharedThings.io
Simple device management system for companies.
